

• ZERO SPAM. CLEAN INBOX. FINALLY.

Only the emails that matter

Imagine opening your inbox and seeing zero spam. No junk. No scams. Just the emails you actually need to read. IdentifyEmail cleans your inbox around the clock and keeps it that way.

HOW IT WORKS

Your inbox cleans itself. Here's how.

It runs all day, every day. You just open your inbox and see what matters.

1

We scan everything

Every email gets checked the moment it arrives — spam, junk, and anything sketchy gets caught right away.

2

We sort it for you

Real emails from real people go to your inbox. Everything else gets held aside so it never bothers you.

3

Your inbox stays clean

No more scrolling past junk. Your inbox only has the emails you actually need to read and respond to.

4

You stay in control

Get a simple daily report of everything we caught. One tap to let something through or block it forever.

WHAT YOU GET

A smarter inbox — plus real security behind it

Zero spam, finally

Junk mail, promotions from strangers, and spammy newsletters never make it to your inbox. Gone.

Gets smarter every day

The more you use it, the better it gets. It learns who matters to you and keeps your inbox focused.

Knows real vs. fake

We can tell if an email was written by a real person, a bot, or an AI — so you know what you're dealing with.

Blocks dangerous stuff

Virus-infected files and sketchy links get caught and stopped before you ever see them.

Verifies real senders

We confirm that the person emailing you is actually who they say they are using trusted ID services.

Always watching

Your inbox is checked every 60 seconds, all day, every day. Protection that never takes a break.

YOUR DAILY DIGEST

See what got cleaned out today

Every day you get a quick report showing what we caught. Nothing gets deleted — you can always let something through or block it for good with one tap.

What the badges mean

Blocked
This sender is on your block list

AI-written
This email was probably written by AI

Unverified
We don't know who this sender is yet

Verified
This sender proved who they are
